- Brings out natural colors of display items
- Spreads light, reducing amount of track heads needed

Applications

- Art galleries
- Museums
- Picture lighting
- Retail stores
- Conference rooms
- Hallway display lighting
- Wall wash

Get Beautiful, Quality Display Lighting with FROST-PAR

The FROST-PAR™ halogen lamp is designed with art galleries, museums, and retail displays in mind. The FROST-PAR has a special frost coating that properly diffuses light, eliminating striations and hot spots associated with over-lighting. They provide a bright, glare-free light to properly display artwork, artifacts, and merchandise.

FROST-PAR is manufactured with the same top-grade materials and intensive engineering as all Litetronics halogen lamps. With a 5,000-hour rated life, FROST-PAR lamps last twice as long as standard halogen lamps.

The FROST-PAR halogen lamp provides the quality of expensive light and filter systems, and they spread out light so that fewer track heads are needed. This saves on fixture, lamp, labor, and energy costs. Upgrade to FROST-PAR lighting today, and see the difference the right light can make.
