

MICRO BRITE™

Cold Cathode Fluorescent Lamps

CCFL

Features and Benefits

- 18,000-hour life
- Up to 75% energy savings compared to incandescent
- Dimmable
- Fits standard fixtures
- Reduces replacement and maintenance costs
- 18-month warranty

Applications

- General lighting
- Dimmable applications
- Floor and table lamps
- Hotels
- Restaurants
- Wall sconces

Litetronics Leads the Dimming Evolution with the 15-Watt Micro-Brite Cold Cathode Lamp

Litetronics International, Inc. is proud to unveil its 15-watt Micro-Brite cold cathode fluorescent lamp – the world's best dimmable fluorescent lamp. In response to industry needs, Litetronics engineered the 15-watt cold cathode lamp with 750 lumens to replace incandescent lamps in dimmable applications that require more light output than lower wattage CCFLs. Micro-Brite's cold cathode technology allows it to dim to 5% of its light output, making it an ideal lamp to use in restaurants and recessed cans. Unlike incandescent lamps that undergo color shift when dimmed, the 15-watt Micro-Brite dims with consistent 2700K color.

Used to replace a 60-watt incandescent lamp, the 15-watt Micro-Brite CCFL saves up to 75% on energy costs, and its long 18,000-hour life helps save maintenance, replacement, and labor costs. The 15-watt Micro-Brite lamp comes with an 18-month warranty. Experience the next evolution in dimmable fluorescent technology with the 15-watt Micro-Brite.
