Micro-Brite™ cold cathode fluorescent lamps from Litetronics are a direct replacement for incandescent lighting. Micro-Brite lamps have an average rated life of 25,000 hours and can save up to 85% in energy savings when compared to incandescent lamps. Due to their extremely long life, Micro-Brite lamps significantly reduce maintenance and replacement costs. By reducing labor and utility costs, Micro-Brite lamps actually pay for themselves.

The Micro-Brite 2 and 3-watt S14 lamps and 4-watt A15 lamps are excellent for many applications that would normally use 11 to 25-watt incandescent lamps. Unlike standard fluorescents, these lamps work in flashing applications as well. Micro-Brite is an excellent choice for signage and general lighting purposes. With so many applications and excellent savings, Micro-Brite lamps are a superior lighting choice.
