

Drywall Mount Kit

Installation Instructions

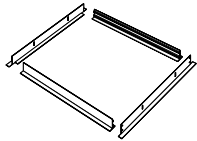

For 1'x4', 2'x2', and 2'x4' sizes. Compatible with LED Light Panel and LED Volumetric Troffer products.

2' X 2' Model Shown

WHAT COMES IN THE BOX

The Drywall Mount Kit comes with the following standard parts:

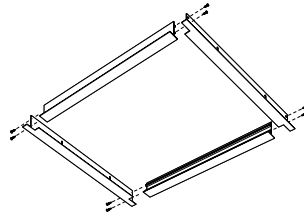

(1) Frame - 4 Piece

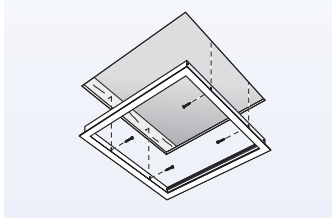

(8) Frame Screws

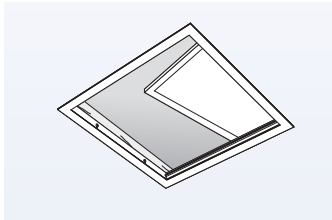

Before beginning installation, carefully remove accessory parts from packaging, inspect and ensure all pieces are accounted for.

1. Turn off power.
2. Assemble all four parts of the frame using the included frame screws.

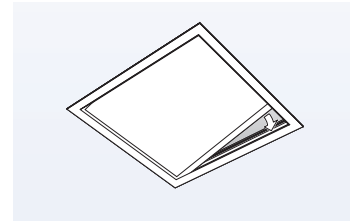

3. Insert the assembled frame into the designated ceiling space/wooden frame/steel structure and secure it to the existing studs by drilling mounting screws through each slot on both sides.

4. Once the frame has been mounted to the ceiling studs, raise the panel up through the frame into the ceiling.

5. Wire driver to power supply by following steps in the product installation instructions.

6. Once the wiring is complete, lower the panel down into the frame until it rests on the frame and sits flush.
7. Turn on power and you are done.
