

HOTEL AMBIANCE WITH LITETRONICS QUALITY

LIGHTING SOLUTIONS DESIGNED EXCLUSIVELY
FOR THE HOSPITALITY INDUSTRY

Litetronics Spiral-Lite and Neolite lamps exceed even the toughest standards for hospitality lighting. With a small M.O.L. that fits in harps, higher lumens than the competition, fast warm-up time, and a long life to reduce maintenance costs, Litetronics CFLs save money on energy, while maintaining an inviting, comfortable atmosphere for your guests.

- Smallest M.O.L. in the industry
- Fast warm-up time – under 30 seconds
- Energy Star qualified
- Saves up to 75% on energy
- 10,000 to 15,000-hour life reduces maintenance costs
- 2700K provides soft tones similar to incandescent
- Only 1mg of mercury (Neolite)

SUSTAINABILITY

A growing number of consumers are seeking businesses that are environmentally sustainable. Replacing incandescent bulbs with Litetronics CFLs is one of the easiest things you can do to make your hotel more earth-friendly.

Litetronics' CFLs help protect the environment by using up to 75% less electricity than comparable incandescent bulbs. This helps conserve natural resources used in energy generation - such as coal, oil, and natural gas - while reducing greenhouse gas emissions. These savings are reflected in your bottom line as a lower utility bill, but they are also reflected in cleaner air and a greener environment.

-  Litetronics CFLs last up to 15 times longer than incandescent and reduce the amount of lamps disposed in landfills
-  Litetronics CFLs use up to 75% less electricity and help conserve natural resources
-  Litetronics CFLs reduce the amount of greenhouse gases released into the atmosphere

PREMIUM PERFORMANCE

Litetronics CFLs offer top performance across the entire hospitality product line.
