# LED SELECTABLE STRIP FIXTURE

WATT AND CCT SELECTABLE

## DESCRIPTION

The LED Strip Fixture is a modern, energy-efficient, linear lighting solution that delivers consistent, high-quality light distribution, minimal energy usage and zero maintenance.

Designed with versatility in mind, the selectable model includes selectable color temperature as well as selectable wattage, allowing the installer to fine-tune the fixture to better meet the needs of the application. Each size offers a range of four color temperature settings (3000K, 3500K, 4000K & 5000K) as well as three unique wattage settings.

Additional accessories can further expand the features of the LED Strip Fixture and make it sensor capable with the additional sensor box (SFASB1) and sensor (SC010) both sold separately.

The fixture is available in either 2', 4' or 8' lengths and can be surface, suspension, or t-grid mounted, either in a single-fixture configuration or as a continuous row to cover more ground from one power source. The lightweight, two-piece design makes installation quick and easy, reducing overall project time.
