

LED Retrofit Kits

Improved Energy Efficiency and Easy Installation

- ✓ Quick and easy installation
- ✓ Reduce lighting costs by up to 85%
- ✓ Safer and lower-maintenance than fluorescent fixtures
- ✓ Rated for up to 100,000 hours, with a 10-year warranty
- ✓ Flexible to the user's needs with multiple CCT, Wattage settings, and Tunable Watt functionality

Fewer Tools. Faster Installation. Better Lighting.

Switching to LED lighting doesn't have to be a lengthy, complicated, disruptive project.

The Litetronics line of LED retrofit kits makes it simple and quick to upgrade to LED lighting, even in the trickiest installation settings.

In only a matter of minutes, the fixture's in place and ready to shine, with reliable, clean light, reduced energy usage, and the long-lasting quality you can count on from Litetronics.

Retrofit Lighting Kit Capabilities Can Include:

- » Bluetooth control via LiteSmart mobile app
- » Occupancy sensing
- » Daylight harvesting
- » Time scheduling
- » Group editing
- » Scene selection

Why Litetronics?

Since our founding in 1970, we've been finding innovative ways to make lighting easier to install, better looking, longer lasting and more efficient.

"Thanks to our Litetronics LEDs, our lighting is so much brighter and whiter than before and will deliver a payback period that made our decision a no-brainer."

– Jerry Gray, Javo Beverage

Litetronics LED Retrofit Lighting Products

LED Magnetic Retrofit

A direct replacement for fluorescent tubes, the one-piece LED magnetic retrofit kit snaps into the existing troffer, enabling hands-free wiring and speedy installation. With four models and energy saving features like adjustable wattage, 0-10V dimming or tri-level dimming, and sensor compatibility, this versatile fixture is the perfect fit.

LED Light Panel Retrofit

This grid ceiling LED panel retrofit easily mounts between the grid rail and the existing fluorescent troffer, providing an updated yet traditional look – and consistent and optimal light – with ease. This retrofit has a full range of capabilities, including powerful controls and energy-saving sensors with our smart model, and LiteSmart app.

LED Volumetric Retrofit

Like our Light Panel Retrofit, the LED Volumetric Retrofit installs easily between the rail and troffer and comes with a powerful array of options and controls, all with a sophisticated, modern look. And as with many of our retrofit kits, it has a 100,000-hour rated life backed by a 10-year warranty.

LED Strip Retrofit

No more flickering fluorescent tubes! The LED Strip Retrofit is a direct replacement, mounting easily into existing fixture housings anywhere from 2.75" to 5" wide. With four lumen packages, two lengths, and three color temperatures, this retrofit delivers bright, reliable light for a decade – or more!
