LED Strip Retrofit *Installation Instructions*

Ordering Code: SRC Series - Selectable Wattage,
CCT and Adjustable Width 2.7" to 5.3"

WHAT COMES IN THE BOX

- (1) LED Strip Retrofit
- (1) Installation instructions
- #8 x 1/2" Self-tapping screws -
(4) For 2' & 4' fixtures | (6) For 8' fixture
- (1) Service Label
- (1) Retrofit Label
- (1) Ground Cable Self Tapping Screw
- (2) Self-tapping screws for safety cable

TOOLS NEEDED

- Wire Stripper
- Wire Cutter
- Phillips Screwdriver
- Step Ladder

SAFETY INSTRUCTIONS AND WARNINGS

When using electrical equipment, basic safety precautions should always be observed.
Read and follow all safety instructions.

- Installation should only be conducted by a qualified electrician in accordance with NEC and any relevant local building codes.
- Risk of fire or electric shock. Fixture installation requires knowledge of luminaires electrical systems. If not qualified, do not attempt installation. Contact a qualified electrician.
- Be certain electrical power is OFF before and during installation and maintenance.
- Fixtures must be connected to a wiring system with an equipment-grounding conductor.
- Make sure the supply voltage is the same as the rated luminaire fixtures voltage.
- Only those open holes indicated in the photographs and/or drawings may be made or altered as a result of this kit strip installation. Do not leave any other open holes in an enclosure of wiring or electrical components.
- To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or sharp objects.
- Suitable for damp locations.

INSTALLATION

BEFORE BEGINNING INSTALLATION, TURN OFF POWER AT THE CIRCUIT BREAKER.

1. Inspect the Strip Retrofit to understand its components. See Figure A.
2. Turn off power at the electrical panel, refer to Figure ①.
3. Remove the existing tubes, sockets, cover plate and ballast. Leave the housing in place, refer to Figure ②.
4. Before attaching the retrofit to the housing, find the wattage/CCT switch besides the driver and select the preferred wattage and color temperature, refer to Figure ③.

Wattage settings:

- 4' retrofit: 18W (2,250 lumens) | 25W (3,125 lumens) | 30W (3,750 lumens) | 40W (5,000 lumens)
- 8' retrofit: 46W (5,750 lumens) | 60W (7,500 lumens) | 70W (8,750 lumens) | 80W (10,000 lumens)

CCT settings:

- 3500K | 4000K | 5000K

CCT & Watts Slide Switch Default Settings

Size	Watts	CCT
4' Retrofit	40W	4000K
8' Retrofit	80W	4000K

5. Unhook the safety cables from the retrofit strip. Secure the safety cables by screwing them directly into the housing using provided self-tapping screws, refer to Figure ④. Now hook back the safety cables with the retrofit strip, the retrofit will now hang from the housing.
6. Once fixture is securely hanging, make wiring connections using the included quick-connector, refer to Figure ⑤. Install the ground wire into top of existing fixture, refer to Figure ⑥.

Black = AC Line

White = AC Neutral

Green = Ground

Purple = Dimming (+)

Gray/Pink = Dimming (-)

Yellow = 12V (+)
7. When wiring is complete, adjust width arms as per your width housing. Range of width can be from 2.7" to 5.3" refer to Figure ⑦.
8. Raise the retrofit up to the housing and secure it using the included screws. Use the pre-drilled holes on each side of the retrofit as a guide, refer to Figure ⑧.
9. Apply the included retrofit and service labels to the outside of the housing.
10. Restore power and your installation is complete, refer to Figure ⑨.
