LED SMART VOLUMETRIC TROFFER RETROFIT

WITH SELECTABLE CCT & TUNABLE WATTS

DESCRIPTION

Combining top-of-the-line efficiency with a sophisticated, architectural design, the LED Volumetric Troffer Retrofit is an ideal solution for indoor commercial spaces, including grid ceiling applications.

The Smart Volumetric Troffer Retrofit brings a new level of control and convenience to indoor lighting. Occupancy sensing and daylight harvesting capabilities automatically decrease energy use, and each feature can be customized to the preference of the occupants. Setup is easy with the LiteSmart mobile app or LiteSmart Plus iPad app, which enables group control, custom settings and scene configurations, all via bluetooth technology from your own mobile device or iPad.

Installation of the fixture is simple and quick; this LED troffer fits seamlessly into all standard 2' x 4', 2' x 2' or 1' x 4' grid ceiling layouts. It can also be surface and suspension mounted, or recessed into drywall ceilings. Each room or group of fixtures can be controlled via LiteSmart, LiteSmart Plus or by a wall mounted bluetooth switch.
