

LED Round High Bay – SL

HBS200
LED Round High Bay - SL

Safe – Reliable – Versatile – Efficient

When the ceilings are high, so are the lighting demands. Places like sports facilities and industrial areas require lots of bright, clean light that's easy to maintain and operate.

Litetronics LED Round High Bay – SL is an affordable direct replacement for HID fixtures, resulting in brighter, cleaner light — and lower energy costs.

This lightweight and compact luminaire packs a big punch but is a breeze to install; it can be mounted directly to existing HID configurations and includes a generous 6" power cord. Installation is done in minutes, and customers enjoy reduced energy costs right away — especially when paired with occupancy sensors and daylight harvesting.
