LITETRONICS®

Plug-in Bluetooth Control Module with IR (BCM01)
For use with:
- **Light Panel (PT*S)**
- **Light Panel Retrofit (PRT*S)**
- **Strip Fixture (SFS*)**
- **Pluggable Sensor SC010**

Installation Instructions

The BCM01 plug-in PIR sensor enables wireless control of fixtures, or groups of fixtures, through the LiteSmart mobile app.

LiteSmart* offers complete control over your fixtures; includes occupancy sensing, daylight harvesting, dimming, grouping, time schedule programming and scene creation.

LiteSmart is available in the app store for download to either IOS or Android devices.

Download on the App Store | **GET IT ON Google Play**

These Bluetooth control and switches offer control of your fixtures wirelessly.

Bluetooth Control and Switches – Available for purchase from Litetronics under parts # SCR054, BCS03 or BCS05.

* A detailed user guide for LiteSmart can be viewed or downloaded from
www.litetronics.com/resources/downloads/litesmart-mobile-app-user-guide

PANEL INSTALLATION - PT*S

Installing the BCM01 sensor is quick and simple.

- Before installation, ***always turn off the power from main circuit first!***
1. To remove sensor cover, use a flat screw driver at sensor COVER notch and gently pull out cover from frame (Figure 1).
