

Eco Halogen A-Line

A19

The New Shape of Halogen.

Eco Halogen A-Line is LITETRONICS' answer to inefficient incandescent A-shape light bulbs, which are being phased-out through federal legislation. DOE and EISA-Compliant, they offer a choice and an affordable alternative for anyone who prefers the look and cost-effectiveness of incandescent bulbs over CFL or LED. They use the same Halogen technology that gives Halogen PARs their crisp white light & perfect color rendition, only now it's packaged in an everyday, general purpose A-shape. Available as a 40, 60, or 100-watt replacement, Eco Halogen A-Line is an affordable next step for incandescent users.

Benefits

- EISA and DOE Compliant
- Up to 28% energy-savings versus incandescent
- 100 CRI for perfect color rendering
- Whiter white than incandescent

Markets & Applications

- Restaurants
- Hospitality
- Retail
- Casino
- Cinema
- General Lighting
- Museums
- Office Lighting
- Open fixtures
- Table and Floor Lamps
