

LED Garage Light

11" Round

The LED Garage Light offers an affordable option for facility managers to upgrade parking garage lighting to LED, creating better visibility and making it an overall safer environment for visitors, while significantly reducing operating and maintenance costs.

Certified as a DLC Premium product, this luminaire goes above and beyond the minimum rating, delivering up to 133 LM/W from both the 39W and 59W models. It's high efficiency combined with polycarbonate Fresnel lens and 160° beam angle ensure wide-spreading, uniform light, potentially decreasing the number of fixtures needed in a space. The optional microwave motion sensor takes savings a step further, enabling occupancy sensing and daylight harvesting, each fully programmable on unit or remotely via a remote control accessory.

This unit is designed for easy installation, with surface or pendant mounting capabilities. The easy-mount connecting plate enables hands-free wiring for surface mounting, saving effort, time and cost on the installation process.

Benefits

- Affordable price
- DLC Premium certified
- Up to 133 LM/W
- 0-10V Dimming (dims to 6%)
- Programmable sensor with occupancy and daylight sensing (Optional)
- Sensor remote control
- IP54 rated
- 5 year warranty
- 50,000 hour rated life
- Easy installation for surface or pendant mounting
- 160° beam angle
- Polycarbonate Fresnel lens

Markets

- Parking Garages
- Covered walkways
- Entranceways
- Canopies
- Soffits

Applications

- Commercial
- Industrial
- Residential

LED Garage Light

11" Round

Technical Product Information

Average Rated Life: 50,000H

CRI: 83

Power Factor: ≥0.95

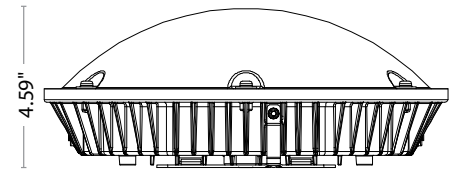

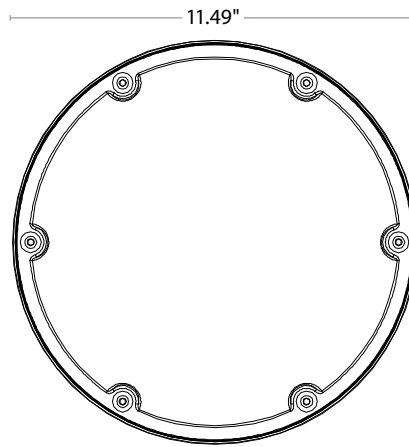

Weight: 7.05 lbs.

Beam Angle: 160°

Operating Temp.: -4°F to 113°F

Volts: 120-277V

Dimming: 0-10V

Part Number Matrix

XX (product family)	XX (wattage)	X (voltage)	XX (shape)	XX (color temperature)	XX (dimming)	X	X (optional sensor)
GL = LED Garage Light	39 = 39 watts 59 = 59 watts	U = 120-277V	R = Round	40 = 4000K 50 = 5000K	DL = 0-10V Dimming	Blank=Standard P=Premium	S=Sensor
